

ENVIRONMENTAL POLICY STATEMENT

Kimberly Williams Interiors Ltd. strives to offer Clients the best possible economic, social, and environmental value for their individual project.

We are developing internal and external strategies that will help reduce our environmental impact, both in the way we deliver projects as well as in our own business practices.

The following lists our company's priorities for supporting our environment

- o Commitment to our community through preference of local products and support of organizations and associations benefiting the places we live and work.
- o Using and specifying environmentally safe, friendly and sustainable products.
- o Purchasing policies and communication to influence and improve environmental outcomes of our suppliers.
- o Dedication to education, training, research and knowledge sharing for all employees. Helping our employees learn how to integrate sustainability into projects, and supporting employees in attaining LEED Accredited Professional status.
- o Educating and informing our clients about sustainable options that provide value to their project and providing honest information about the known environmental impacts of our company and products.
- o Manage waste effectively so that it is sold, donated, reused or recycled.
- o Incorporating sustainability into our day-to-day business and office environment. Working to implement time, energy and resource saving systems to reduce the environmental footprint of our business practices.
